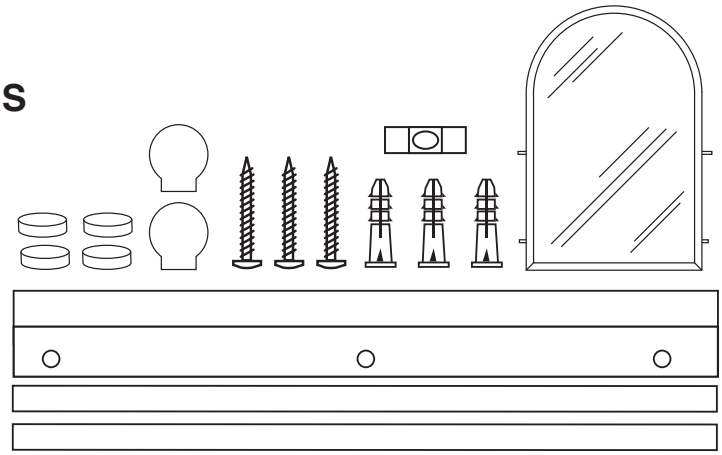
Model #8452 Chateau Mirror

MOUNTING INSTRUCTIONS FOR MIRRORS



Parts List:
- 1 Beveled Mirror with Mounting Bracket
- 12” Wall Mounting Clip
- 3 Plastic Wall Anchors
- 3 Screws
- 4 Flat End Caps
- 2 Round Decorative Tops
- 1 Disposable Level

Tools Needed:
Pencil and Eraser, Drill and 3/16” Drill Bit,
Screw Gun or Driver with Phillips Head,
Tape Measure, Hammer and Friend to help.
(Two People are required to mount this mirror).

WARNING: Always wear safety goggles and gloves when handling glass. Handle mirror carefully. Do not bump mirror against hard surfaces. Place on towel or soft surface such as carpet when handling. READ INSTRUCTIONS CAREFULLY BEFORE STARTING.

#1 Insert Rails into rail Holders **(Fig. 1)**. By creating a soft surface with a towel on a leveled table or counter. Carefully stand the mirror vertically on the surface. Make sure the Holders are unobstructed by the set screws. If so, untighten the set screws until they are not seen in the shaft. Slide the rails into the holders until the rail stops at the soft surface. Now tighten the set screws. Do the same to the other side. The rails are now evenly installed on the mirror.

#2 Using a tape measure, check the location where the mirror is to be installed. Be sure the mirror will fit in the desired location. Approximately 26”W x 38”H is needed for the mirror to fit.

#3 Place the mirror on the wall in area chosen. (Two people are needed for this task). Position the mirror at the desired height in the center of the location. With Pencil mark a dot or line on the very top edge of the arch. See (**Fig.2**) Set mirror aside In safe place.

Fig.1

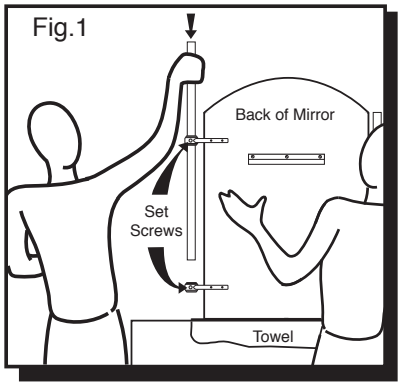


Fig.2

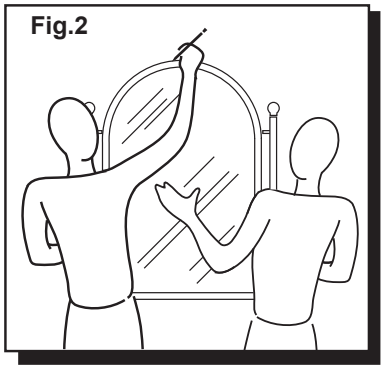

#4 From the dot made on the wall, using a tape rule, measure down 10 1/4" and mark the spot on the wall (**Fig.3**)

#5 From this spot, position the 12” Hanging Clip. The top of the hanging clip should be centered on the spot marked on the wall 10 1/4" from the top of the mirror. Mark the locations for the screw holes at the bottom of the clip, using the level to make sure the clip is level and straight. (**Fig.4**) Set the clip and level aside.

Fig.3

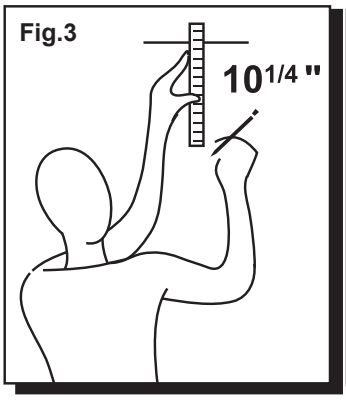

Fig.4

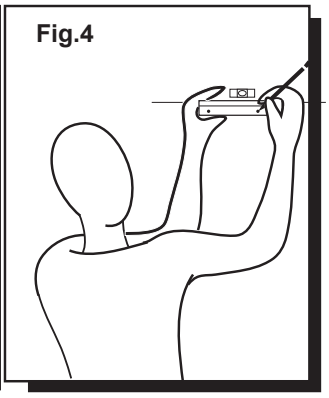

#6 Using the Drill and 3/16” Drill Bit-Pre Drill the holes for the wall anchors. Lightly tap the plastic wall anchors into place with hammer.

#7 Reposition the 12” Clip and secure to the wall with the screws provided. Check the level again to determine that the clip is straight and level. (**Fig.5**)

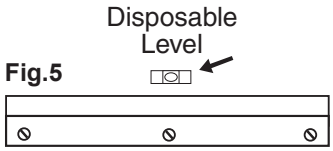

Fig.5

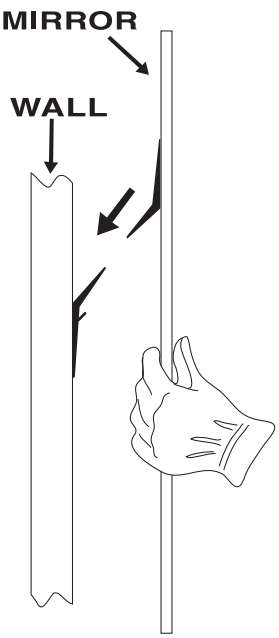

#8 Carefully place the mirror with the mounting plate onto the installed wall clip. Mirror can be adjusted side to side by gently sliding the mirror along the clip. With mirror centered installation is complete - you look marvelous.

#9 Two decorative hardware tops. Choose between contemporary flat or traditional round.
